

Are you aged 50-74? You're at higher risk of bowel cancer.

Bowel cancer is Australia's second biggest cancer killer. It takes more Australian lives than breast, prostate or skin cancer.

Bowel cancer doesn't always have warning signs. A simple at-home test can help find it early, when it can be successfully treated.

Do the home test when you receive it in the mail –
it could save your life!

1 Have you ever done the simple bowel home test (sent to you in the mail)?

Yes No Unsure

If you answered yes above

2 Have you done the simple bowel home test (sent to you in the mail) in the last two years?

Yes No Unsure

Please **discuss your answers** with the doctor or nurse at your visit today.
