

BOWEL SCREENING CAN SAVE YOUR LIFE.

**Make sure you're around to be strong
and healthy for your family.**

Bowel cancer is the second most common cause of cancer deaths in Australia. But if it's found early, up to 90% of cases can be successfully treated. So make sure you use your free bowel cancer screening test.

The test is easy, and can be done in the privacy of your own home.

GET IT

People aged 50 to 74 will receive a kit in the mail.

DO IT

The test is free and will take just a few minutes at two different times. So don't put it off until later – get it done.

POST IT

Return the kit in the mail using the envelope provided. You don't need stamps or to pay for postage.

DONE

The results will be sent to you and your doctor within two weeks.

The National Bowel Cancer Screening Program is expanding and by 2020 people aged 50-74 will receive a kit every two years.
