BreastScreen
AUSTRALIA

A joint Australian, State and Territory Government Program

BreastScreen

AUSTRALIA

A joint Australian, State and Territory Government Program

Most breast cancers occur in women over the age of 50. As women grow older, the risk of developing breast cancer increases.

BreastScreen Australia provides **free screening mammograms** every two years to women aged 50-69 without breast cancer symptoms.

Most women who are diagnosed with breast cancer **DON'T** have a family history of this disease.

If you are over 50, we recommend you call **BreastScreen Australia** now on **13 20 50** (for the cost of a local call) for more information or to book a **FREE** screening mammogram in your State or Territory.
