

A NEW AND BETTER TEST FOR WOMEN

Talk to your health worker today – for yourself, your family and your community.

Nyampuju-ko-nyurruju test maijaku - karrata - karntaku rarralypamanjalla.

The new and better test replaces the old Pap test, and you only have to do it every 5 years.

If you're aged 25 – 74 you should speak to your health worker about when you need your next test, this is normally two years after your last Pap test. It's a great way to make sure you're strong and healthy for your family, kids and community.
